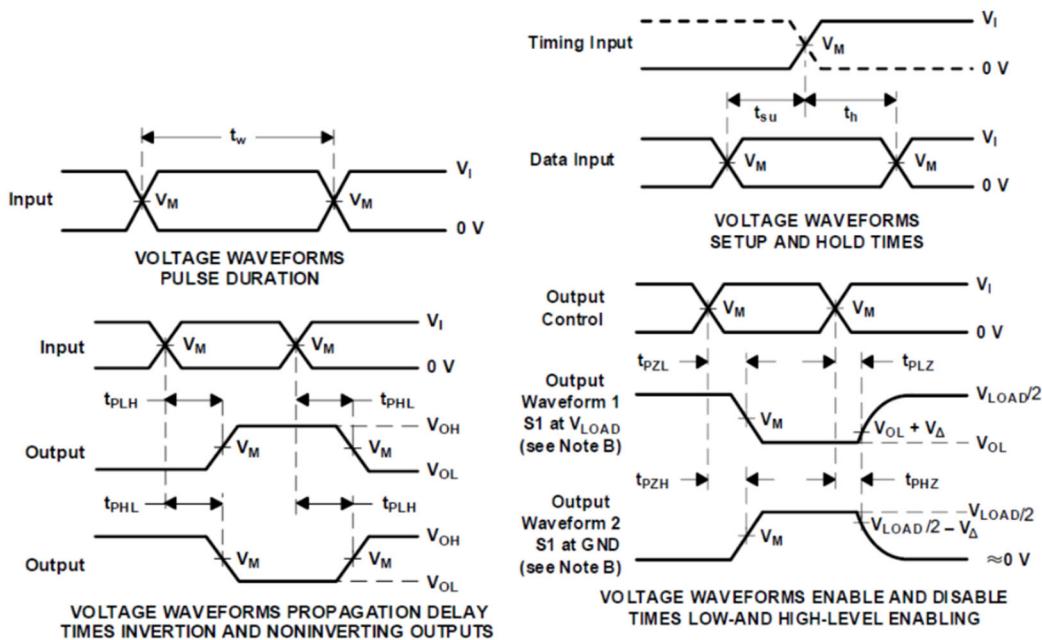

Fig 1. Load Circuit and Voltage Waveforms

- (A)  $C_L$  includes probe and jig capacitance.
- (B) Waveform 1 is for an output with internal conditions such that the output is low, except when disabled by the output control. Waveform 2 is for an output with internal conditions such that the output is high, except when disabled by the output control.
- (C) All input pulses are supplied by generators having the following characteristics: PRR  $\leq 10$  MHz,  $Z_0 = 50 \Omega$ .
- (D) The outputs are measured one at a time, with one transition per measurement.
- (E) Since this device has open-drain outputs,  $t_{PLZ}$  and  $t_{PZL}$  are the same as  $t_{pd}$ .
- (F)  $t_{PZL}$  is measured at  $V_M$ .
- (G)  $t_{PLZ}$  is measured at  $V_{OL} + V_\Delta$ .
- (H) All parameters and waveforms are not applicable to all devices.
